Experiment Manual For Analog Control System

Ver. 2.0

June 2009

Headquarter

香港九龍清水灣香港科技大學新翼大樓 3639 號
Room 3639, Annex Building, HKUST,
Clear Water Bay, Kowloon, Hong Kong
Tel.: (852) 2358 1033, (852) 2719 8310
Fax: (852) 2719 8399

Table

Copyright Statement.....	I
Disclaimer.....	I
Trademarks.....	I
Table.....	II
Preface.....	5
Chapter 1 System Introduction.....	6
1. System Composition.....	6
1.1 Signal Source Module.....	6
1.2 Signal-setting Module.....	6
1.3 Signal Connector Module.....	7
1.4 Motor Connector.....	7
1.5 Power Supply.....	8
1.6 Analog Circuit Module.....	8
1.7 Motor Velocity Detection Module.....	8
1.8 Power Amplifier.....	9
1.9 Reserved Module.....	9
Chapter 2 Analog Circuits Experiment of the Typical Elements.....	10
2.1 Experiment Objectives.....	10
2.2 Experimental equipment.....	10
2.3 Experiment Contents.....	10
2.3.1 Proportion Element.....	10
2.3.2 Inertia Element.....	11
2.3.3 Integration Element.....	12
2.3.4 Differential Element.....	13
2.3.5 Subtraction Circuit.....	14
2.3.6 Summation Circuit.....	14
2.4 Experimental Procedure.....	15
2.4.1 Proportion Element.....	15
2.4.2 Inertia Element.....	16
2.4.3 Integrated Element.....	16
2.4.4 Differential Element.....	16
2.4.5 Subtraction Element.....	17
2.4.6 Summation Element.....	17
2.5 Experiment Report.....	18

Chapter 3 <i>Single Closed-loop Velocity Modulation System of DC Servo Motor</i>	
Experiment 19	
3.1 Experiment Objectives	19
3.2 Experimental equipment.....	19
3.3 Experiment Theory.....	19
3.3.1 The composition and working principle of the single closed-loop velocity modulation system	19
3.3.2 The controller of the single closed-loop velocity modulation system	21
3.4 Experiment Procedure	23
3.4.1 Motor experiment in open-loop mode.....	23
3.4.2 Motor experiment in closed-loop mode	23
3.5 Problems	24
Chapter 4 <i>Position Follow-up System of DC Servo Motor</i>.....	
25	
4.1 Experiment Objectives	25
4.2 Experimental equipment	25
4.3 System Components and Working Principle	25
4.3.1 Components of position stochastic system.....	25
4.3.2 Working principle of position follow-up system	26
4.3.3 Analog controller of position loop.....	26
4.4 Experiment Steps	28
Chapter 5 <i>Ball & Beam Control System</i>.....	
29	
5.1 Objectives	29
5.2 Experimental equipment	29
5.3 System Components and Working Principle	29
5.3.1 Components of position follow-up system.....	29
5.3.2 Working principle of position follow-up system	30
5.3.3 Analog controller of position loop.....	30
5.3.4 Components of ball & beam control system	32
5.3.5 Working principle of position stochastic system	32
5.3.6 Analog controller of position loop.....	32
5.4 Experiment Steps	34
5.4.1 DC motor position follow-up system	34
5.4.2 Ball & Beam system closed-loop control.....	34
Chapter 6 <i>Magnetic Levitation Ball Control System</i>	
36	
6.1 Objectives	36
6.2 Experimental equipment	36
6.3 System introduction	36

6.4	Experimental principle.....	37
6.5	Experiment Steps.....	39
6.6	Problems.....	40
